

VINAY CHANDRA KARTHIK UPPANAPALLI

Buffalo, NY | +1 (716) 520-4015 | uvinaychandrakarthik@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2 years of experience building web applications, backend services, REST APIs, and data-driven systems using Python, JavaScript, TypeScript, React, Node.js, Flask, and PostgreSQL. Experienced in designing modular services, integrating complex systems, working with relational databases, and deploying scalable applications on AWS. Strong problem-solving background translating ambiguous business requirements into maintainable engineering solutions while considering scalability, reliability, system boundaries, tradeoffs, and user impact.

EXPERIENCE

Ganson Street Consulting

Jan 2026 - Present

Software Engineer / AI Developer Intern

Buffalo, NY

- Designed and developed a modular six-microservice application using Python and Flask, integrating processing services through REST APIs and structured data flows across three enterprise workflows.
- Built a Flask-based web application and REST API layer that enabled users to trigger workflows, browse cases, review results, and audit system decisions across the pilot environment.
- Designed backend services with reusable modules, structured error handling, fallback strategies, and edge-case handling, achieving 99% successful completion across 1,000+ test runs.
- Integrated external APIs and relational database storage, applying schema-aware data access and query optimization practices in SQLite while designing components for extensibility and maintainability.
- Translated ambiguous workflow requirements into modular components spanning data ingestion, processing, decision logic, APIs, and user-facing functionality; iterated with stakeholders on usability and system behavior.

Accenture

Oct 2023 - Jan 2025

Associate Software Engineer

Hyderabad, India

- Developed backend services and REST APIs using TypeScript and Node.js for three enterprise clients, exposing application and analytics capabilities to 50,000+ users and increasing feature adoption 35% quarter over quarter.
- Integrated production Node.js services with MongoDB data pipelines and frontend application modules, supporting more than 1 million requests per month at 99.9% uptime.
- Improved backend performance through caching, query optimization, structured error handling, and edge-case logic, maintaining sub-200 ms p95 latency for production endpoints.
- Built data-processing pipelines handling 10M+ event records, reducing batch-processing time from four hours to 35 minutes through distributed processing and workload optimization.
- Deployed production services on AWS using Lambda, S3, EC2, Docker, and Kubernetes, contributing to CI/CD pipelines that reduced release cycles from three weeks to four days.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, HTML, CSS, Angular, modern frontend development

Backend: Python, Node.js, Express.js, Flask, REST APIs, Microservices, API Design

Databases: PostgreSQL, SQLite, SQL, Relational Databases, MongoDB, Schema Design, Query Optimization

Cloud & DevOps: AWS (Lambda, S3, EC2, EKS), Docker, Kubernetes, CI/CD, Git, Linux, Bash

Software Engineering: Data Structures & Algorithms, OOP, System Integration, Distributed Systems, Scalability, Error Handling, Testing, Agile

AI & Data: OpenAI API, LangChain, LangGraph, RAG, scikit-learn, Pandas, NumPy, PySpark

PROJECTS

Full Stack Portfolio Web Application | Angular, Node.js, MongoDB, REST APIs, AWS

- Building a full-stack application with frontend components, Node.js backend services, REST endpoints, and database schemas for dynamic content management and AWS deployment readiness.

Multi-Agent Research Application | Python, Flask, LangGraph, LangChain, REST APIs

- Built a modular application coordinating backend components for web search, document retrieval, processing, and summarization, producing structured results in under 30 seconds.

EDUCATION

University at Buffalo, SUNY | Master of Science, Data Science and Applications | Jan 2025 - May 2026 | GPA: 3.7

DNR College of Engineering and Technology | Bachelor of Technology, Computer Science and Engineering | 2023 | GPA: 3.5

CERTIFICATIONS

AWS Certified Cloud Practitioner

Accenture Certified Multi-Platform Frontend Developer, 2024

MedTourEasy Data Analyst Trainee, 2024
